EXPERIENCE

JPMorganChase

Chicago, IL

Software Engineer I

July 2026 – Present

- Build configurable banking workflow management platform deployed by 10+ Commercial and Investment Bank partners

Software Engineer Intern

May 2025 – August 2025

- Built dashboard consolidating 25+ config types across 3 environments providing unified source of truth for developers
- Designed and prototyped LLM-based ledger configuration creation minimizing cognitive load for product partner testing
- Technologies: React, TypeScript, Spring, Java, Kubernetes, AWS

Georgia Tech Research Institute, Electronic Systems Laboratory Test Engineering Division

Atlanta, GA

Software Engineer Intern

May 2024 – August 2024

- Built custom test visualizer for open architecture test engineers in 2 projects allowing for convenient anomaly detection
- Wrote end-to-end tests providing full functionality checks and product compliance against sponsor requirements
- Technologies: Python, FastAPI, SQLAlchemy, Pytest, Playwright, Svelte, TypeScript, Tailwind CSS, CI/CD

Kerygma Digital

Remote

Software Engineer Intern

June 2023 – July 2023

- Reduced service response latency by 60% (~400 ms) for 5m BibleBot users by implementing a TTL HTTP cache in C#
- Decreased HTML and JSON cache usage by 99% and 39% by creating custom middleware to strip stored responses
- Technologies: C#, ASP.NET, .NET Core, MongoDB Atlas, Discord API

PROJECTS

Gazelle (WIP) • [github/andrewtlu/gazelle](https://github.com/andrewtlu/gazelle)

- Build open-source TUI for managing OpenVPN configs on Linux to streamline connect/disconnect/manage action flows

Odyssey • [github/project-emory/odyssey](https://github.com/project-emory/odyssey)

- Built employee hub dashboard for Odyssey Family Counseling 501(c)(3) to streamline HR-employee interactions
- Technologies: Next.js, TypeScript, Supabase, Prisma, Tailwind CSS, GitHub Projects

Efficient Speech Emotion Classification • [github/ShaneBerhoff/cs334-project](https://github.com/ShaneBerhoff/cs334-project)

- Built Python toolkit to transform audio and achieve 78.6% accuracy over 6 emotions with ImageNet transfer learning
- Technologies: Python, PyTorch, NumPy, Convolutional Neural Networks, Transfer Learning, Deep Learning

Personal Website • [github/andrewtlu/andrewtlu.github.io](https://github.com/andrewtlu/andrewtlu.github.io)

- Researched and designed a personal portfolio to gain frontend/design experience and inform Project Emory lessons
- Technologies: Svelte/SvelteKit + Vite, TypeScript, HTML, CSS, Figma, Firefox/Chrome Developer Tools

EDUCATION

Emory University • B.S. Summa Cum Laude in Computer Science, Minor in Applied Math

Atlanta, GA

- **GPA:** 4.0/4.0, **Coursework:** DSA, Operating Systems, Algorithms, ML, Comp. Ling., Info Vis. August 2022 – May 2026

LEADERSHIP AND COMMUNITY ENGAGEMENT

RUF Emory

Atlanta, GA

Worship Leader/Ministry Team Member

January 2023 – May 2026

- Created safe environment for students to hear the Gospel and wrestle with hard questions through worship + fellowship

Project Emory

Atlanta, GA

Cofounder/Director of Projects

May 2023 – May 2026

- Crafted engaging curriculum to enhance technical proficiency and provide working experience to 30+ Emory students
- Led scrum team of 7 Emory volunteers in building software solutions for nonprofits to advance social good in Atlanta

ADDITIONAL SKILLS AND INTERESTS

Software: (*proficient*): Python, Java, JavaScript/TypeScript, HTML/CSS, C (*familiar*): Bash, Batch, C#, Go

Interests: Rock Climbing, Backpacking, Grass Volleyball, Modded Minecraft, GNU/Linux, Guitar, Systematic Theology
